Nursing & Retirement Home Water Treatment

© ProCare Water Treatment Inc.

Nursing and Retirement Home *Legionella* Control and Prevention using Copper Silver Ionisation Water Treatment in Domestic Water and/or Open Cooling Towers.

A Nursing Home (or a Retirement Home) domestic water or open cooling tower(s), can be among the most susceptible to a *Legionella* outbreak, cause of Legionnaires' Disease.

Copper Silver Ionisation water treatment technology is a safe, scientifically proven, chemical free and affordable solution to prevent possible *Legionella* related environmental health issues. Copper Silver Ionisation is acknowledged by many health organizations such as the WHO and the EPA as an **accepted** *Legionella* control secondary water treatment technology.

AquaLyse® Copper Silver Ionisation systems for domestic potable water treatment or open cooling towers are available in a variety of configurations to accommodate any water conditions and volumes.
